You can select 5 people from your team for trainings and exam

80% TO QUALIFY

for at least 3 of 5 participants

THEORY & PRACTICE

Show your easyBI knowledge & skills

6 HOURS

4 parts, with time limits, 2 weeks to complete

CERTIFICATION GUIDELINES

Process of becoming a certified easyBI Partner

flex.bi

academy@flex.bi

The exam consists of 4 sections that test theory and practical skills required for every Certified partner!

PART 1 QUIZ

1,5 h

Covers following topics:

- easyBI Use Cases
- easyBI implementation process
- easyBI Basic Concepts
- Dashboard usage & navigation
- Account & server management
- Publishing and visualizing
- Data Access roles
- Other easyBI possibilities and features

Recommended flex.bi Academy training:
Dashboard King, Report Master

PART 2 MDX

1,25 h

In this part we are testing your knowledge of MDX queries that you learned in MDX trainings.

Requirements:

- Capability to read and understand calculated measures and members
- Ability to read, understand and apply different easyBI MDX functions
- Knowledge on how to handle error messages when writing calculated member and measures
- Understanding on how to use Tuples to optimise calculated members and measures

Recommended flex.bi Academy training:
Report Master, MDX Guru

PART 3 REPORT BUILDING

1,75 h

In this part we are testing your practical Report building skills 🛠️ as they are very important to deliver Gold Level service for easyBI customers.

Requirements:

- Understanding of report building process and architecture
- Knowledge of all the available report building options and architecture
- Knowledge of all the available report visualisation options - Charts & Tables
- Ability to Create Dashboards using good practices

Recommended flex.bi Academy trainings:
Dashboard King, Report Master

PART 4 DATA ADMIN

2 h

In this part we are testing your skill of Defining custom fields and Advanced settings for data import.

Required knowledge:

- Adding new calculated fields to import
- Building new dimensions with values that are based on higher level issues
- Creating new dimensions based on issue links
- Creating additional issue hierarchies based on linked fields

Recommended flex.bi Academy trainings:
MDX Guru, Data Admin

Certificate is provided by easyBI after qualification.
